

Aluminum Muffler Maintenance

Aluminum corrodes when it comes in contact with dust, mud and road salt.

To remove stains, use Scotch Brite Hand Pad # 7447 (maroon) or equivalent.

Wet the pad and polish using strokes following the surface finish around the muffler.

Clean the muffler using a wet sponge and a mild detergent, then rinse well with clean water.

Dry the muffler with a soft clean cloth, using strokes following the surface finish around the muffler.

(1) Surface finish

CAUTION:

- * Avoid using steel wool, polishing compounds, or wax on an aluminum muffler. Steel wool may damage or discolour the surface. A polishing compound or wax may discolour the surface after its heated by engine operation.
- * Muffler Stain Remover (Scotch Brite Hand Pad # 7447) is for removing stains on the aluminum mufflers only.
- * Protect the muffler before you apply any chemical detergent to clean your rear wheel. Chemical products accidentally applied to the muffler may damage the surface of it.
