

BRAKE SYSTEM INSPECTION

(Refer to the maintenance precautions on page 65).

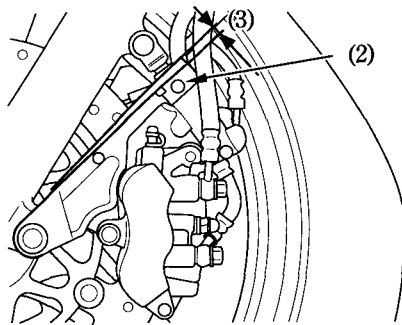

Check the brake system as follows:

1. Place the motorcycle on its side stand, stop the engine, and place the transmission in neutral.

(1) Left caliper assembly

2. Move the left caliper assembly (1) upward and measure the stroke of the tip of the secondary master cylinder (2). If the stroke (3) exceeds 4.0 mm (0.16 in), see your Honda dealer.

(2) Secondary master cylinder
(3) Stroke
